

Blue Source – Allegheny IFM Project

Inventory Methodology Change Log 4/14/2020

- **Plot Offsetting:** Clarification added to not move/offset plots for any reason. Plots deemed temporarily unsafe should be revisited at a later time and/or with additional safety equipment. For plots deemed permanently unsafe, the plot is not to be measured and the crew should reach out to Bluesource for further guidance.

Inventory Methodology Change Log 12/13/2019

- **Data Collection:** A clarification was made to match the “Determining “In” Trees” section that a tree is considered within the plot if the center of the tree at DBH (rather than at the base) is within the radius/border of the plot.
