

U.S. FOREST OFFSET PROJECT DATA REPORT ANNUAL REPORTING PERIOD – ALL PROJECT TYPES

OPR Staff Use Only	Date Report Received:	OPR Tracking Number:	Date Report Reviewed:	OPR Staff Use Only
---------------------------	------------------------------	-----------------------------	------------------------------	---------------------------

Complete for all reporting years. Entities submitting the project's first Offset Project Data Report must submit the information requested in both **Initial Reporting Period** and the **Annual Reporting** forms to the appropriate Offset Project Registry. For every reporting period thereafter, submit only the information requested in the Annual Reporting Period form.

PART I. ENTITY SUBMITTING REPORT

Is this form being submitted by the Offset Project Operator (OPO) or by the Authorized Project Designee (APD)? <i>Note: The person completing this form should be an OPO/APD employee.</i>			<input type="checkbox"/> OPO <input checked="" type="checkbox"/> APD
Report Version Number: 2.1.2.1	Date Report Completed: July 7, 2020	Date Report Submitted: July 7, 2020	
Person Completing Report: James D. Clark	Phone Number: 707-485-7211	Email Address: jimclark@ncrm.com	

PART II. OFFSET PROJECT INFORMATION

Offset Project Name: Congaree River			
OPR Project ID#: ACR292	ARB Project ID# (if known): CAFR5242	Offset Project Commencement Date: October 21, 2015	
Date of Last Full (On-Site) Verification: October 24, 2016	Reporting Period Start Date: July 1, 2018	Reporting Period End Date: June 30, 2019	
Is this report being submitted for a verification year?			<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Protocol Version for Project Listing: <input type="checkbox"/> October 20, 2011 <input checked="" type="checkbox"/> November 14, 2014		Protocol Version for Project Reporting: <input type="checkbox"/> October 20, 2011 <input checked="" type="checkbox"/> November 14, 2014	
Is this Offset Project Data Report (OPDR) being submitted for the project's initial Reporting Period? If "yes", the entity submitting this report must also submit the information required in section 9.1.1 of the U.S. Forest protocol. To submit that information, an OPO/APD submitting an OPDR may use one of three Initial Reporting Forms identified in the question immediately below.			<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
With this Annual OPDR, is any one of the following three U.S. Forest Offset Project Data Report Initial Reporting Period forms also being submitted?		<input type="checkbox"/> Reforestation <input type="checkbox"/> Improved Forest Management <input type="checkbox"/> Avoided Conversion	

PART III. OPO/APD INFORMATION

A. OPO			
OPO Name: Congaree River, LLC, an Illinois LLC		OPO's CITSS ID#: CA 2001	
Mailing Address: 53 W Jackson Blvd. Suite 530	City: Chicago	State: CA	Zip: 60604
Contact Person: Francis Beidler IV	Phone Number: (312) 922-3808	Email Address: fbeidler@congarree.com	
B. APD (if applicable)			<input type="checkbox"/> No APD/Not Applicable
APD Name: James D. Clark		APD's CITSS ID#: CA 1569	
Mailing Address: PO Box 435	City: Calpella	State: CA	Zip: 95418

Contact Person: James D. Clark	Phone Number: (707) 485-7211	Email Address: jimclark@ncrm.com
--	--	--

PART IV. OFFSET PROJECT ELIGIBILITY REQUIREMENTS		
A. Have the Forest Project and associated Project Lands met and been in compliance with all local, state, and federal regulatory requirements during the Reporting Period?		<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
If no, provide an explanation of the non-compliance. N/A		
B. Indicate how the offset project meets the definition of Natural Forest Management per Table 3.2 in the U.S. Forest protocol by completing Questions B1-B4 below: <i>Note: Reforestation projects with deferred inventory and Project Boundaries are still required to complete Questions B1-B4.</i>		
1. Native species:		
a) Does the project consist of at least 95% native species based on the estimated sum of carbon in the standing live carbon pool? <i>If "no," proceed to question 1b. Otherwise, skip to question B2.</i>		<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
b) Describe how the project will result in achieving a 95% native species goal over the project life. N/A		
2. Composition of native species:		
a) Does the Project Area naturally consist of a mixed species distribution such that no single species' prevalence exceeds the percentage value of standing live carbon shown under the heading 'Species Diversity Index' in the Assessment Area Data File? <i>If "no," proceed to questions 2b and 2c. Otherwise skip to question B3.</i>		<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
b) Explain how the project will demonstrate a trend toward achieving the Species Diversity Index of native species and meet this requirement within 25 years. N/A		
c) If the Project Area does not naturally consist of a mixed species distribution: Will or have you provided a written statement from the government agency in charge of forestry regulation in the state where the project is located stipulating that the Project site is not capable of meeting the requirement of mixed species distribution.		<input type="checkbox"/> Yes <input type="checkbox"/> No
3. Distribution of age classes/sustainable management:		
a) Indicate how the project meets the requirement for sustainable management if regeneration or commercial harvesting is either planned or initiated within the Project Area demonstrating sustainable long-term harvesting practices. This applies to all forest landholdings of the Forest Owner(s) (check one of the boxes). <i>The full text associated for the options below is found in section 3.8.1 of the U.S. Forest protocol.</i>		
<input checked="" type="checkbox"/> Third party certification <input type="checkbox"/> Adhere to a renewable long-term management plan <input type="checkbox"/> Employs uneven-aged silvicultural practices & maintain canopy retention averaging 40% across forest <input type="checkbox"/> Not applicable, no commercial harvesting in planned within the project area		
b) On a watershed scale up to 10,000 acres (or the Project Area, whichever is smaller), projects must maintain, or make progress toward maintaining, a maximum of 40% of the project's forest lands in ages that are less than 20 years old. (Areas impacted by Significant Disturbance are exempt from this test until 20 years after reforestation of such areas.) Does the acreage within this project meet this requirement? <i>If "no," proceed to question 3c. Otherwise, skip to question B4.</i>		<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Explain how the project demonstrates continuous progress toward meeting this requirement within the next 25 years. N/A		
4. Structural elements (standing and lying dead wood): How does the project ensure that structural elements are retained in sufficient quantities throughout the project life? See Addendum to OPDR (Annual) IV.B.4.		
C. Has there been a decrease in the standing live carbon stocks within the Project Area over any 10-year consecutive period? <i>For the Initial Reporting Period, check "No." If "No," skip to Part V. If yes, answer questions C1 and C2.</i>		<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
1. If yes, identify the appropriate option and provide additional documentation. <input type="checkbox"/> Decrease is due to the necessity to substantially improve the Project Area's resistance to wildfire, insect, or disease risks. Actions that will be taken to reduce the risks must be documented and the techniques used to improve resistance must be supported by relevant published peer reviewed research. <input type="checkbox"/> Decrease is associated with a planned balancing of age classes and is detailed in a long-term management plan that demonstrates harvest levels can be permanently sustained over time and that		

is sanctioned and monitored by a state or federal agency. This documentation must be submitted at the time of the Project's Listing.

☐ Decrease is part of normal silviculture cycles for forest ownerships less than 1,000 acres.

Note: Documentation is required to be submitted. See Section X for details.

2. Has the Project's inventory of standing live carbon stocks fallen below the Project's baseline standing live carbon stocks, or 20 percent less than the Project's standing live carbon stocks at the project's initiation (whichever is higher)?

☐ Yes
☐ No

PART V. PROJECT CHANGES

A. Is all the information in the offset project listing still accurate?

If "Yes," skip to question B.

☐ Yes
☒ No

1. Does Part II above report an updated Offset Project Commencement Date, Reporting Period Start Date, and/or Reporting Period End Date?

☒ Yes
☐ No

2. Does Part III above report updated OPO/APD Information?

☐ Yes
☒ No

3. Are there updates to the Land Ownership listing information?

If "Yes," provide updates below (and/or provide as separate attachment):

☐ Yes
☒ No

4. Are there updates to the Offset Project Area listing information?

If "Yes," provide updates below (and/or provide as separate attachment):

See Addendum to OPDR (Annual) V.A.4.

☒ Yes
☐ No

5. Are there updates to the Carbon Stock Inventory listing information?

If "Yes," provide updates below (and/or provide as separate attachment):

See Addendum to OPDR (Annual) V.A.5.

☒ Yes
☐ No

6. Are there updates to the Offset Project Baseline listing information?

If "Yes," provide updates below (and/or provide as separate attachment):

See Addendum to OPDR (Annual) V.A.6.

☒ Yes
☐ No

7. Are there any other updates to the listing information?

If "Yes," provide updates below (and/or provide as separate attachment):

See Addendum to OPDR (Annual) V.A.7.

☒ Yes
☐ No

B. Have there been any changes in the status of the Forest Owner including, if applicable per Section 3.8.1 of the U.S. Forest protocol, the acquisition of new forest landholdings?

☒ Yes
☐ No

If yes, describe the changes. Include the sale or transfer of any portion of land within Project Area.

See Addendum to OPDR (Annual) V.B

C. **Optional:** Has a Qualified Conservation Easement (QCE) been recorded since the previous Reporting Period?

If this is for the Initial Reporting Period, check "Yes" if a QCE has been recorded since Listing, check "No" otherwise. If "No," skip to Question D.

☐ Yes
☒ No

Optional: If yes, provide the date the QCE was recorded. Also provide a copy of the QCE to ARB.

N/A

D. **Optional:** Have there been any modifications to the inventory methodology of any carbon pools included in the project's boundary since the last Reporting Period?

All projects are required to document any modifications to inventory methodologies in a change log and obtain approval in advance. Qualifying Reforestation Projects may defer answering this question until the second full verification. If this is for the Initial Reporting Period, check "No," unless there have been modifications since project listing, in which case, check "Yes."

☒ Yes
☐ No
☐ Defer

Optional: If yes, describe the modifications.

See Addendum to OPDR (Annual) V.D.

PART VI. REVERSALS

Note: Qualifying Reforestation Projects may defer items marked with an asterisk until the second verification.

A. Has a reversal occurred during the Reporting Period covered by this report?

If this is for the Initial Reporting Period, check "No."

If "No," skip to question B.

☐ Yes
☒ No

Has the reversal been classified as intentional or unintentional?

☐ Intentional
☐ Unintentional

Optional: Date(s) Reversal Occurred:

N/A

Optional: Estimated Quantity of Reversal in Units of MtCO₂e:

N/A

Describe and explain the reversal.

N/A		
What is the status of the compensation for the reversal? N/A		
B. For verification years ONLY : Has a reversal occurred during the previous six years? <i>If this is for the Initial Reporting Period, check "No."</i>		<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Has the reversal been classified as intentional or unintentional?		<input type="checkbox"/> Intentional <input type="checkbox"/> Unintentional
Optional: Date(s) Reversal Occurred: N/A	Optional: Estimated Quantity of Reversal in Units of MtCO ₂ e: N/A	
Describe and explain the reversal. N/A		
What is the status of the compensation for the reversal? N/A		
C. What is the Project's reversal risk rating?	Risk Rating: 19.24%	<input type="checkbox"/> Defer
What is the Project's fire risk based on level of fuel treatments?	<input type="checkbox"/> High (2%) <input type="checkbox"/> Medium (2.652%) <input type="checkbox"/> Low (3.304%) <input checked="" type="checkbox"/> None (4 %)	

PART VII. HARVEST VOLUMES AND CARBON IN WOOD PRODUCTS

Note: Qualifying Reforestation Projects may defer items marked with an asterisk until the second verification.

A. *Provide an estimate of the harvest volume for this Reporting Period. This estimate refers to the volume of trees harvested for wood products only.	Harvest Volume (Cubic Feet): 199,365	<input type="checkbox"/> Defer
B. *Indicate the estimated mill efficiency for wood products produced from the Project Area following requirements in Appendix C, Section C.2.	Mill Efficiency (percent): 67.5	<input type="checkbox"/> Defer
C. *Provide an estimate of carbon in harvested wood products associated with the harvest volumes reported for this Reporting Period.	Carbon estimate (MtCO ₂ e): 3,887	<input type="checkbox"/> Defer

PART VIII. CARBON STOCKS

In the appropriate columns below, enter the name/identification of all required carbon pools and its estimated carbon stock (MtCO₂e) for the current Reporting Period.

For verification years **ONLY**: Report the estimated carbon stock for every year since the Project's last verification.

☐ Defer

Reforestation Projects may defer full inventory of carbon stocks not affected by site preparation until second verification. If deferring, carbon stocks affected by site preparation must still be reported below.

Carbon Pool <i>Identify the pool by the SSR code (e.g., AC-1) and description (Standing live carbon) in Tables 5.1-5.3.</i>	Current Reporting Period	Current Reporting Period minus 1 year	Current Reporting Period minus 2 years	Current Reporting Period minus 3 years	Current Reporting Period minus 4 years
	7/01/2018 to 6/30/2019	7/01/2017 to 6/30/2018	7/01/2016 to 6/30/2017	/ to /	/ to /
IFM-1 Standing Live carbon	1,303,216	1,267,314	1,290,024		
IFM-3 Standing Dead Carbon	18,141	18,141	17,380		
IFM-7 Carbon in in-use Forest Products	1,538	4,537	2,856		
IFM-8 Forest Product Carbon in Landfills	993	2,931	1,845		

IFM-14 Biological emissions /removals from change in harvesting on forestland outside Project Area	-1,087	0	0		
--	--------	---	---	--	--

PART IX. BASELINE CARBON STOCKS

In the appropriate columns below, enter the name/identification of all required carbon pools and its estimated **baseline** carbon stock (MtCO₂e) for the current Reporting Period.

For verification years ONLY: Report the estimated baseline carbon stock for every year since the Project's last verification.

☐ **Defer**

Reforestation Projects may defer estimating baseline carbon stocks not affected by site preparation until a full inventory is obtained. If deferring, baseline estimates of carbon stock affected by site preparation must still be reported below.

Carbon Pool <i>Identify the pool by the SSR code (e.g., AC-1) and description (Standing live carbon) in Tables 5.1-5.3.</i>	Current Reporting Period 7/01/2018 to 6/30/2019	Current Reporting Period minus 1 year 7/01/2017 to 6/30/2018	Current Reporting Period minus 2 years 7/01/2016 to 6/30/2017	Current Reporting Period minus 3 years / to /	Current Reporting Period minus 4 years / to /
IFM-1 Standing Live carbon	1,165,838	1,165,838	1,165,838		
IFM-3 Standing Dead Carbon	17,380	17,380	17,380		
IFM-7 Carbon in In-use Forest Products	2,474	2,474	2,474		
IFM-8 Forest Product Carbon in Landfills	1,598	1,598	1,598		

PART X. QUANTIFICATION FACTORS

In the appropriate column below, enter the value for the current Reporting Period.

For verification years ONLY: Report the estimated values for every year since the Project's last verification.

Note: Qualifying Reforestation Projects may defer items marked with an asterisk until the second verification.

	Current Reporting Period	Current Reporting Period minus 1 year	Current Reporting Period minus 2 years	Current Reporting Period minus 3 years	Current Reporting Period minus 4 years
	7/01/2018 to 6/30/2019	7/01/2017 to 6/30/2018	7/01/2016 to 6/30/2017	/ to /	/ to /
A. Secondary Effects (MtCO ₂ e)	-1,087	0	0		
B. *Confidence Deduction (%) <input type="checkbox"/> Defer	0.0	0.0	0.0		
C. *Forest Buffer Account Contribution (MtCO ₂ e) <input type="checkbox"/> Defer	6,461	0	556		
D. For Avoided Conversion Projects <u>ONLY</u> : What is the Project's uncertainty discount factor?				%	<input checked="" type="checkbox"/> N/A

PART XI. TOTAL NET GHG REDUCTIONS AND GHG REMOVAL ENHANCEMENTS (QR_y)

In the appropriate column below, enter the total net GHG Reductions and GHG Removal Enhancements (MtCO₂e) for the current Reporting Period and all Reporting Periods since the Project's last full verification.

For verification years ONLY: Report the total net GHG Reductions and GHG Removal Enhancements for every year since the Project's last verification.

Current Reporting Period	Current Reporting Period minus 1 year	Current Reporting Period minus 2 years	Current Reporting Period minus 3 years	Current Reporting Period minus 4 years
	7/01/2017 to 6/30/2018	7/01/2016 to 6/30/2017	/ to /	/ to /
33,582	-20,297	2,891		

PART XII. ATTESTATION AND OPO SIGNATURE

I certify under penalty of perjury under the laws of the State of California the GHG reductions and/or GHG removal enhancements for

Project Name:

Congaree River

from

Reporting Period Start Date:

July 1, 2018

to

Reporting Period End Date:

June 30, 2019

are measured in accordance with the Compliance Offset Protocol

Check the appropriate Compliance Offset Protocol:

☐

U.S. Forest Projects, October 20, 2011,

☒

U.S. Forest Projects, November 14, 2014,

and all information required to be submitted to ARB is true, accurate, and complete.

In signing this form, I certify under penalty of perjury of the laws of California that the information contained in this form is true, accurate, and complete. I further certify that I am duly authorized to represent and legally bind the Offset Project Operator (OPO) on all matters related to this form.

SIGNATURE:

PRINTED NAME:

James D. Clark

TITLE:

Authorized Project Designee

DATE:

July 7, 2020

Background for U.S. Forest Offset Project Data Report Annual Reporting Period – All Project Types

Section 95976(d) of the Cap-and-Trade Regulation specifies reporting requirements for offset projects participating in the Compliance Offset Program. Offset Project Operators (OPO) or Authorized Project Designees (APD) are required to submit an Offset Project Data Report (OPDR) within four months of the end of each (annual) Reporting Period. This form is designed to help OPOs and APDs provide all the information required for offset projects using both the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 and the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (However, this form may be insufficient for reporting all information required by the Compliance Offset Protocol U.S. Forest Projects, June 25, 2015.) This information is submitted to the approved Offset Project Registry that is listing the offset project and should also be provided to the ARB-accredited verification body that will be verifying the Offset Project Data Report.

Items marked as eligible for deferment by Reforestation Projects may be deferred by Reforestation Projects as qualified in section 6.1.1 of the U.S. Forest protocol until submitting the Offset Project Data Report that will undergo the second verification. If deferring, check the "defer" box and leave the remaining fields blank.

Where to Submit Information Contained in This Form

Please complete the information on the form using your computer. Then either add an electronic signature to the form or print, sign, and scan the form. The completed and signed information and all supporting documentation should be emailed to the appropriate Offset Project Registry.

This form is available from the ARB website at:

<http://www.arb.ca.gov/cc/capandtrade/offsets/forms/forms.htm>

Detailed Instructions for U.S. Forest Offset Project Data Report Annual Reporting Period – All Project Types

This form is protected with restricted editing to facilitate completing the form. If the applicant wishes to unprotect the form, the password is "form".

Part I. Entity Submitting Report:

- Indicate whether the Offset Project Operator (OPO) or Authorized Project Designee (APD) is submitting this information.
- Regulatory amendment in section 95976(d)(10) requires that each version of the OPDR specifies the version number and the date submitted. Moreover, the protocol requires that each OPDR include the date of completion. Please include the OPDR version number, the date of OPDR completion, and the date of OPDR submission to the Offset Project Registry.
- The person submitting the information should indicate the date the form is completed.
- List the name, phone, and email address of the person submitting the information. This person should be an employee of the OPO or APD. The person submitting the information need not be the contact person listed for the OPO or APD in Part III and also need not be the OPO's CITSS account representative signing the OPDR in Part XII.

Part II. Offset Project Information:

- Provide the name for the offset project and its Offset Project Registry ID number, as provided by the Offset Project Registry listing the project. Also include the ARB project ID number, if known.
- Indicate the Offset Project Commencement Date and the start and end date of the Reporting Period covered by this Offset Project Data Report. Supply date of last verification.
- Indicate the version of the compliance offset protocol under which the project is listed. Also indicate the version under which the project is reporting. A project may report under the version which it is listed or may transition to a subsequent version. A project may transition only at the time of submitting the initial Offset Project Data Report to the Offset Project Registry (see section 95973(a)(2)(D)).
- Indicate whether this Offset Project Data Report is being submitted for a verification year.
- Indicate if this OPDR is being submitted in the Initial Reporting Period. If yes, then the OPO/APD must also complete the appropriate U.S. Forest OPDR Initial Reporting Period Form in addition to this Annual Reporting Form. Indicate which of the Initial Reporting Period Forms is attached to this OPDR. These forms can be found at: <http://www.arb.ca.gov/cc/capandtrade/offsets/forms/forms.htm>

Part III. OPO/APD Information:

- Provide contact information for the Offset Project Operator (OPO) and Authorized Project Designee (APD) for the offset project. Every project will have an OPO. If a project does not have an APD, please mark the box indicating the project does not have an APD and leave the remaining fields blank.
- For both the OPO and, if applicable, the APD, enter the entity's name, its mailing address, and the name, phone number, and email address of a contact person for the entity. Also include its CITSS ID number. The CITSS ID is six characters in length, with two letters followed by four numbers (e.g., "CA1234"). **DO NOT PROVIDE THE CONFIDENTIAL CITSS ACCOUNT NUMBER**, which begins with the CITSS ID number followed by a hyphen and more numbers.

Part IV. Offset Project Eligibility Requirements

- A. Identify whether the project and associated lands are in compliance with all local, state and federal regulatory requirements for this reporting period. In particular, identify any non-conformance with regard to growth and harvest legal requirements that affect the project area's compliance. If there is a non-compliance within the Project Area, the OPO/APD must identify the non-compliance and provide a description and explanation.
- B. Respond to questions 1-4 to indicate how the project meets the definition of Natural Forest Management. Refer to Section 3.8.2 and Table 3.2 for more information. Responses are required for all projects. Questions pertain to Native Species, Composition of Native Species, Distribution of Age Classes, Sustainable Management, and Structural Elements.
- C. Indicate if there has been a decrease of onsite standing live carbon stocks over a 10-year consecutive period. If so, the OPO/APD must submit the appropriate supporting documentation required in Section 3.8.3 of the U.S. Forest protocol demonstrating that the decrease meets one of three exceptions listed in Protocol.

Part V. Project Changes

- A. Indicate if all the information in the Project Listing Form is still accurate. For information not still accurate, provide the updated information or describe where the updated information is otherwise included in the OPDR.
- B. Indicate if a Forest Owner has acquired new landholdings and describe how the new landholdings meet the requirements of the Compliance Offset Protocol.
- C. Indicate if a Qualified Conservation Easement has been recorded since the previous Reporting Period and submit a copy of the QCE as an attachment to this report. Any changes to the legal constraints affecting the forest offset Project Area or management therein must be described in an attachment. Refer to sections 3.1, 6.1.1, 6.2.1, and 6.3.1 of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in 6.2.1 and 6.3.1 between the two versions.)
- D. Indicate if there has been any modification to the inventory methodology of any carbon pools included in the project's boundary since the last Reporting Period. If yes, then describe any modification. If the OPO/APD has a qualified Reforestation Project that is deferring due to lack of inventory, check "defer." For more detailed requirements, refer to Appendix A.3 of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in Appendix A.3 between the two versions.)

Part VI. Reversals

- A. Indicate if any GHG reductions or GHG removal enhancements that have been issued credits during any prior year have been reversed. If the project's GHG reductions or removal enhancements are negative, regardless of cause of the decrease, these must be reported. Indicate whether it is an intentional or unintentional reversal. This includes planned thinning or harvesting activities if they result in a negative value as specified in the Protocol. Refer to section 7 of the U.S. Forest protocol. If there has been a reversal include the dates the reversal occurred, MtCO₂e reversed, and the current status of the compensation of the reversal. Refer to Section 95983 of the Cap-and-Trade Regulation for information on compensating for reversals.
- B. If the Project is undergoing verification, indicate whether a reversal has occurred during the previous six years unless this OPDR is part of an Initial Reporting Period. All projects must report reversals that occurred since the previous verification. Projects submitting an Annual Offset Project Data Report must report any reversals and provide a written description and explanation of the reversal, including whether it is intentional or unintentional and the status of compensation for the reversal. If there has been a reversal include the dates the reversal occurred, MtCO₂e reversed, and the current status of the compensation of the reversal. Refer to Section 95983 of the Cap-and-Trade Regulation for information on compensating for reversals.

- C. Indicate the project's reversal risk rating following the requirements of Appendix D of the U.S. Forest protocol. The reversal risk rating must be determined prior to listing and recalculated every year the project undergoes verification. Also indicate the project's fire risk based on the level of fuel treatments, as required in Appendix D.

Part VII. Harvest Volumes and Carbon in Wood Products

- A. Estimate the harvest volume in pounds of biomass with zero moisture content following the steps in Appendix C, Section C.1 of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in Appendix C.1 between the two versions.)
- B. Report the mill efficiency identified in the project's Assessment Area from the Forest Offset Protocol Resources on the ARB website: <http://www.arb.ca.gov/cc/capandtrade/protocols/usforestprojects.htm>
- C. Report the metric tons of carbon in the harvested wood products following the quantification methodology in Appendix C of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in Appendix C.1 between the two versions.)

Part VIII. Carbon Stocks:

- Reforestation Projects may defer full inventory of carbon stocks not affected by site preparation until second verification. If deferring, carbon stocks affected by site preparation must still be reported. Refer to section 6.1.1 of the U.S. Forest protocol.
- Write the name and Sources, Sinks, and Reservoirs (Column "SSR") and the associated identification number found in Tables 5.1-5.3 of the U.S. Forest protocol for the appropriate project type for each included carbon pool. Write the name and SSR for all required pools even if deferring the submission of data.
- Enter the current Reporting Period estimate of the identified carbon pool (MtCO₂e) in the second column. Follow the method in Appendix A, Sections A.2 and A.3 of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in Sections A.2 and A.3 between the two versions.) Check "defer" in the space provided if deferring the submission of data.
- If submitting the Offset Project Data Report for a verification year, carbon stock estimates for every year since the last verification must be provided in the remaining columns.

Part IX. Baseline Carbon Stocks:

- Reforestation Projects may defer estimating baseline carbon stocks not affected by site preparation until a full inventory is conducted. If deferring, baseline estimates of carbon stock affected by site preparation must still be reported. Refer to section 6.1.1 of the U.S. Forest protocol.
- Write the name and/or identifier of each required carbon pool in the first column. Refer to Section 5 of the U.S. Forest protocol. Please list the carbon pools in the same order as in Part VIII. Write the name and/or identifier of all applicable pools even if deferring the submission of data.
- Enter the current Reporting Period baseline estimate of the identified carbon pool (MtCO₂e) in the second column. Follow the method in Section 6 and Appendix B of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in Section 6 and Appendix B between the two versions.) Check "defer" in the space provided if deferring the submission of data.
- If submitting the Offset Project Data Report for a verification year, carbon stock baseline estimates for every year since the last verification must be provided in the remaining columns.

Part X. Quantification Factors

- The current Reporting Period column is required for all submissions. If submitting the Offset Project Data Report for a verification year, values for every year since the last verification must be provided in the remaining columns.
- A. Estimate the project's secondary effects (MtCO₂e) including the appropriate secondary effect sources, sinks, and reservoirs required in Section 5 and following the quantification methodology in Section 6 of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some differences in Section 6 between the two versions.)
- B. Determine the confidence deduction (percentage) following Appendix A.4 of the U.S. Forest protocol.
- C. Estimate the buffer account contribution (MtCO₂e) based upon application of the forest offset project's Reversal Risk Rating to the total net GHG Reductions and GHG Removal Enhancements.
- D. Report the calculated uncertainty discount factor (percentage) as determined following the requirements of Section 6.3 of either the Compliance Offset Protocol U.S. Forest Projects, October 20, 2011 or the Compliance Offset Protocol U.S. Forest Projects, November 14, 2014. (There are some

differences in Section 6.3 between the two versions.) Projects other than Avoided Conversion should check the "N/A" box.

Part XI. Total Net GHG Reductions and GHG Removal Enhancements (QRy):

- Determine the total net GHG reductions and GHG removal enhancements (MtCO_{2e}) following Equation 6.1 in the U.S. Forest protocol.
- Current Reporting Period column is required for all submissions. If submitting the Offset Project Data Report for a verification year, the total net GHG Reductions and GHG removal enhancements for every year since the last verification must be provided in the remaining columns.

Part XII. Attestation and OPO Signature:

- Section 95975(d)(5) of the Cap-and-Trade Regulation requires an attestation for Offset Project Data Reports. The attestation should be initialed by the person signing the form.
- The attestation requires the applicant to provide some information to complete the statement. The offset project name and Reporting Period start and end dates should match the information provided in Part II. Also indicate the protocol version under which this project is reporting. This may differ from the version under which the protocol is listed.
- Amendments adopted in April 2014 to section 95976(d)(6) require the attestation "be provided to an Offset Project Registry with the Offset Project Data Report if the offset project is listed with an Offset Project Registry."
- The individual signing the document must be registered in CITSS as the OPO's Primary Account Representative or Alternate Account Representative. The individual signing the document may be an APD employee and/or representative; but to sign the document, the individual must be an Account Representative on the OPO's CITSS account.
- Please provide the individual's signature, printed name, corporate title, and date signed.

Congaree River

Addendum to OPDR for the Annual Reporting Period Form

Under

Air Resources Board

Compliance Offset Protocol – U.S. Forest Projects

Adopted: November 14, 2014

Prepared July 7, 2020

Version 2.1.2.1

Offset Project Operator	Authorized Project Designee
Congaree River LLC, an Illinois LLC 53 W Jackson Blvd., Suite 530 Chicago, IL 60604 (312) 922-3808	James D. Clark PO Box 435 Calpella, CA 95418 (707) 485-7211

Reporting Period

The reporting period for this Offset Project Data Report is from 7/1/2018 to 6/30/2019.

Protocol Version

Air Resources Board

Compliance Offset Protocol – U.S. forest Projects

Adopted: November 14, 2014

The OPDR and all other project documentation and reports that reference carbon stocks have been prepared and submitted by James D. Clark, California Registered Professional Forester (No. 2528).

Introduction

Congaree River is an Improved Forest Management (IFM) Project that is seeking registration under the California Air Resources Board Compliance Offset Protocol – U.S. Forest Projects Adopted: November 14, 2014. The Offset Project Operator is Congaree River, LLC, an Illinois LLC. The Project is approximately 5,440 acres in size, and is comprised of three properties or tracts, the Rancheria Northeast Tract, Rancheria Southwest Tract, and the Lawson Tract, located in Mendocino County.

IV.B.1.

The Congaree River Project Area is characterized by a mix of Redwood, Douglas-fir, and other mixed conifers, tanoak, madrone, and other native hardwoods. Approximately 100% of the Project's biomass is in native species, and thus the Project meets the 95% criteria for carbon in native species.

IV.B.2.

The Congaree River Project Area is characterized by a mix of predominantly redwood, tanoak, and Douglas-fir, and hardwoods, consisting of Pacific madrone, bigleaf maple, live oak, California bay laurel, and other native hardwoods and conifers. It is estimated that, as of 6/30/16, the Project Area is composed of approximately 32% Douglas-fir, 29% redwood, 30% tanoak, 5% pacific madrone, and 4% other hardwoods by basal area. The Congaree River owner intends to manage the timber stands to maintain or increase conifer stocking, ensuring that the Project continues to meet the requirements for composition of native species under Table 3.2 (page 20) of the Compliance Offset Protocol by maintaining species' basal area percentage below 60%, the Species Diversity Index from the Assessment Area Data File.

IV.B.3.

- (a) During Reporting Period 4 (RP4) a commercial harvest was finalized under Timber Harvest Plan (THP) 1-16-136MEN . Harvesting on the Project during RP4 was approximately 1,208 MBF. The Congaree River Project meets condition 1 under Section 3.8.1 of the Compliance Offset Protocol by being certified under the American Forest Foundation Tree Farm System certification program as project ID CA-2754A and CA-2754C. All of the Congaree River timberlands, with the exception of new forestland holdings obtained since the project was listed, are included in the American Tree Farm System as project IDs CA-275B, SC-MIL-0014 and SC-MIL-0015.
- (b) The project proposes to employ primarily uneven-aged management which will maintain no more than 40% of the Project's forested acreage in ages less than 20 years at a watershed scale up to 10,000 acres.

IV.B.4.

The Congaree River project does not remove incidental lying dead wood as a part of its stand management activities. It is expected that the accumulation of lying dead wood will be commensurate with recruitment from standing dead trees. The Congaree River project is committed to maintaining if not increasing, the number of standing dead trees within the Project Area as a component of its forest management objectives. The Congaree River project does not currently, nor does it intend in the future to actively pursue salvage operations on its timberlands. Congaree River project has a policy of allowing standing dead trees to remain and recruiting large specimen trees across its ownership as components of its overall timber management strategy.

The Congaree River Project Area has not recently undergone any salvage harvesting. Therefore, all that must be demonstrated is that the greater of one metric ton of carbon per acre or 1% of standing live carbon stocks is present in standing dead wood, or that progress towards these

targets is ongoing. The project contains an average of 0.91 Mg C per acre and 1.39% of standing live carbon stocks in standing dead wood. The project will continue to make progress towards the above mentioned standing dead wood target.

V.A.1

The end of the initial reporting period was changed from April 30, 2016 to June 30, 2016 in part II of the initial OPDR.

V.A.4

The Project Area acreage was changed from 5,550 acres to 5,440.15 acres in part V of the initial OPDR and the acreage of the project lands within each assessment area was modified in part V.A of the initial OPDR.

V.A.5

The initial standing live and standing dead stocks were augmented, with updated figures in part VII.C. of the initial OPDR.

V.A.6

The Offset Project Baseline information was augmented, with updated figures in part VIII of the initial OPDR.

V.A.7

The application for listing document stated harvesting has occurred since the Offset Commencement Date. This has been corrected in part VII.A of the initial OPDR, as no harvesting occurred from the Offset Commencement Date through the end of the initial reporting period.

A table showing biomass components utilized by decay class, for the calculation of standing dead carbon stocks, was added in part VII.B of the initial OPDR.

In part VII.B of the initial OPDR the table of FIA equations was augmented with updated figures and the wood densities utilized are now taken from Table C.1 of Appendix C of the Protocol.

The inventory carbon stocks for the initial reporting period were updated with augmented figures in part VII.C of the initial OPDR.

The application for listing, in part VII.C, stated a harvest is planned during the initial reporting period. This was removed, in part VII.C of the initial OPDR, as no harvest was planned or occur during the initial reporting period.

The inventory confidence statistics was updated with augmented figures in part VII.D of the initial OPDR.

The estimated contribution to the Forest Buffer Account during the initial reporting period was augmented, with updated figures in part VII.E of the initial OPDR.

The percent of basal area composition by species was augmented with updated figures in part V.I of the initial OPDR.

Structural elements (standing and lying dead wood) were updated with augmented figures in part VI.D.4 of the initial OPDR.

V.B.

The Forest Owner acquired new forest landholdings on April 3, 2018 as identified in Section IV.B.3.a above. These additional landholdings are not contiguous with Congaree River. Per Section 3.8.1 of the protocol, these new landholdings will be incorporated within the American Tree Farm Certification of all of Congaree River's forestlands within five years of the acquisition date.

V.D.

The inventory methodology has been revised to include clarifications on data collection procedures, and the inclusion of the walkthrough method is lieu of offsetting plots. These modifications are described in the attached Inventory Change Log.

VIII.

Carbon Pool	Source	Gross CO2e Tonnes per Acre	Total Gross CO2e Tonnes	SSR
Live Carbon Stocks	Sample Plots	239.56	1,303,216	IFM-1
Standing Dead Carbon Stocks	Sample Plots	3.33	18,096	IFM-3
Sum of CO2-equivalent Tonnes from Required Pools		242.89	1,321,357	
Carbon in in-use Forest Products	Harvest Records	N/A	1,538	IFM-7
Forest Product Carbon in Landfills	Harvest Records	N/A	993	IFM-8
Biological emissions/removals from change in harvesting on forestland outside Project Area	Harvest Records	N/A	-1,087	IFM-14

XI.

Quantification of Net GHG Reductions and GHG removal enhancements:

Reporting Period		RP2	RP3	RP4	Notes
1	Actual Onsite Stocks	1,307,403	1,285,455	1,321,357	This is the total carbon in all reported pools within the Project Area, regardless of statistical confidence. ($AC_{\text{onsite}, y}$)
2	Confidence Deduction	0.0%	0.0%	0.0%	The confidence deduction is based on the sampling error of the combined estimate of carbon in all onsite carbon pools (see above). (CD_y)
3	Adjusted Actual Onsite Stocks (Adjusted for Confidence Deduction)	1,307,403	1,285,455	1,321,357	Actual onsite carbon stocks adjusted using the confidence deduction. $AC_{\text{onsite}, y} * (1 - CD_y)$
4	Annual Increment in Actual Onsite Carbon Stocks	2,585	-21,948	35,902	Difference from prior year ($\Delta AC_{\text{onsite}}$). In year 1, prior year stocks are assumed to be zero, so difference is equal to initial adjusted onsite carbon stocks.
5	Baseline Onsite Carbon Stocks	1,183,218	1,183,218	1,183,218	Baseline estimates of onsite carbon stocks are not affected by the confidence deduction. ($BC_{\text{onsite}, y}$)
6	Annual Increment in Baseline Onsite Stocks	0	0	0	Difference from prior year ($\Delta BC_{\text{onsite}}$). In year 1, prior year stocks are assumed to be zero, so difference is equal to initial unadjusted) onsite carbon stocks.
7	Quantified GHG Reductions / Removals for Onsite Stocks	2,585	-21,948	35,902	Row 4 minus row 6. ($\Delta AC_{\text{onsite}} - \Delta BC_{\text{onsite}}$)
Accounting for Carbon Stored in Wood Products					
8	Actual Wood Products In-use	2,856	4,537	1,538	Carbon stored long-term In-use, calculated from actual harvested carbon values. (Component of $AC_{\text{wp}, y}$)

Reporting Period		RP2	RP3	RP4	Notes
9	Actual Wood Products Landfill	1,845	2,931	993	Carbon stored long-term in landfills, calculated from actual harvested carbon values. If actual harvest volumes for the year(s) are less than baseline harvest volumes, then this value is included in $AC_{wp,y}$.
10	Actual Wood Products PDM	18,394	29,223	9,904	Based on actual carbon in standing live carbon stocks harvested in each year(s), prior to delivery to mills (PDM). Used to calculate Secondary Effects.
11	Baseline Wood Products In-use	2,474	2,474	2,474	Carbon stored long-term In-use, calculated from averaged baseline carbon values. (Component of $BC_{wp,y}$).
12	Baseline Wood Products Landfill	1,598	1,598	1,598	Carbon stored long-term in landfills, calculated from averaged baseline carbon values. If actual harvest volumes for the year(s) are less than baseline harvest volumes, then this value is included in $BC_{wp,y}$.
13	Baseline Wood Products PDM	15,338	15,338	15,338	Based on carbon in standing live carbon stocks harvested each year(s) in the baseline analysis, prior to delivery to mills (PDM). Used to calculate Secondary Effects.
14	Difference in Actual and Baseline Carbon Stored in Wood Products	382	2,063	-1,541	Difference between actual and baseline carbon stored long-term in wood products in each year ($AC_{wp,y} - BC_{wp,y}$). May be negative.
15	Quantified GHG Reductions / Removals for Carbon Stored in Wood Products	306	1,651	-1,233	Equal to $(AC_{wp,y} - BC_{wp,y}) * 80\%$ (the Market Response Factor). May be negative.
Accounting for Secondary Effects					
16	PDM Difference	3,056	13,885	-5,434	The difference between the values in

Reporting Period		RP2	RP3	RP4	Notes
					rows 10 and 13, above.
17	Secondary Effect Adjustment	0	0	-1,087	Either zero, if the value in row 15 is positive, or 20% of the value in row 16 if it is negative. (SE_y)
Calculation of Total Net GHG Reductions/Removals and Buffer Pool Contribution					
18	Negative Carryover from Prior Year	0	0	0	This is any negative amount from the prior year's total net GHG reductions/removals that is not due to a reversal. (N_{y-1})
19	Total Net GHG Reductions/Removals	2,891	-20,297	33,582	Equal to the sum of the values in rows 7, 15, 17, and 18. (QR_y)
20	Total ROCs Issued	2,891	0	33,582	Total number of ROCs that ARB will issue for quantified GHG reductions/removals, rounded to the nearest whole tonne.
21	Risk of Reversal	19.24%	19.24%	19.24%	Reversal Risk Rating from Table 6 above.
22	Required Buffer Pool Contribution	556	0	6,461	The number of ROCs that must be contributed to the Buffer Pool each year, based on the risk of reversal. Calculated by multiplying the Total ARBOCs Issued (row 20) by the risk of reversal (row 21). Any remainder must be rounded to the nearest tonne.
23	ROCs Issued to the Project	2,335	0	27,121	Total ROCs issued to the Project in each year. Equal to row 20 minus row 22.
