Ruby Canyon Environmental, Inc. (RCE) conducted the verification of the ACR191 MS Renováveis Wind Power Complex: Mar e Terra, Areia Branca, Embuaca and Icarai project (Project) for the reporting period August 11, 2015 – December 31, 2019. The goal of the GHG verification was to ensure that the GHG assertion is materially correct, that the data provided to RCE can be documented and if errors or omissions are detected, they be corrected. The scope of the verification included renewable electricity generation at four wind power plants displacing CO<sub>2</sub> emissions from fossil fuel combustion for electricity generation. The verification was conducted to the American Carbon Registry Standard Version 3.0, the CDM Methodology ACM0002: Grid-connected electricity generation from renewable sources version 15.0, the validated Project Plan dated November 2014, the Monitoring Report for this reporting period dated May 31, 2021 and ISO 14064-3:2006.

The data and information supporting the GHG assertion were historical in nature. Based upon the processes, procedures and evidence reviewed, RCE concludes that the GHG assertion is a fair representation of the Project emission reductions or removals resulting during the reporting period. RCE confirms that the GHG assertion is:

- Without material discrepancy, and
- Verified to a reasonable level of assurance.
- No qualifications or limitations

**Verified Emission Reductions or Removals**

<b>Vintage</b>	<b>Baseline Emissions (mtCO<sub>2</sub>e)</b>	<b>Project Emissions (mtCO<sub>2</sub>e)</b>	<b>Leakage Emissions (mtCO<sub>2</sub>e)</b>	<b>Emission Reductions (mtCO<sub>2</sub>e)</b>
