Ruby Canyon Environmental, Inc. (RCE) conducted the verification of the ACR114 GreenTrees ACRE (Advanced Carbon Restored Ecosystem) project (Project) for the reporting period January 1, 2020 – December 31, 2020. The verification was conducted to the ACR Standard, October 2010, v2.1, the ACR Forest Carbon Project Standard, November 2010, v2.1, the ACR Methodology for Afforestation and Reforestation of Degraded Land, v1.0, March 2011, associated tools and ISO 14064-3:2006.

The data and information supporting the GHG assertion were historical in nature. Based upon the processes, procedures and evidence reviewed, RCE concludes that the GHG assertion is a fair representation of the Project emission reductions or removals resulting during the reporting period. RCE confirms that the GHG assertion is:

- Without material discrepancy, and
- Verified to a reasonable level of assurance.
- No qualifications or limitations

The verified emission reductions or removals are below.

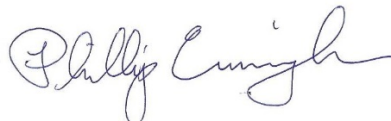

Vintage	GHG Reductions and Removals (mtCO ₂ e)	Risk Buffer (mtCO ₂ e)	Emission Reductions (mtCO ₂ e)
2020	1,179,164	195,714	983,450
Total	1,179,164	195,714	983,450
