d. Are there any other updates about Others Involved in Project, aside from the Technical Consultants, to report?

☐ Yes ☒ No

If answered "yes" above, provide those updates:

e. Are there any updates about the Offset Project Location to report?

☐ Yes ☒ No

If answered "yes" above, provide those updates:

f. Does Part V below report updated information about Mining Methods Employed?

☐ Yes ☒ No

g. Are there any updates about the Mine Information, aside from Mining Methods Employed and Mineral Production, to report?

☐ Yes ☒ No

If answered "yes" above, provide those updates:

h. Does any other information in the project listing need to be updated?

☒ Yes ☐ No

If answered "yes" above, provide those updates:

Schedule II and III attached to describe updated Mine Operator Information

PART V: MINE INFORMATION

Mining Method(s) Employed at Mine 1 while Active (e.g., longwall or room and pillar):

Longwall

☒ N/A Mining Method(s) Employed at Mine 2 while Active (e.g., longwall or room and pillar):

☒ N/A Mining Method(s) Employed at Mine 3 while Active (e.g., longwall or room and pillar) :

☒ N/A Mining Method(s) Employed at Mine 4 while Active (e.g., longwall or room and pillar):

Mineral Production during Reporting Period (including both mineral produced and quantity with units of measurement): N/A

PART VI: REPORTED GHG EMISSION REDUCTION CALCULATIONS

How many qualifying and non-qualifying destruction devices were used in this reporting period?

NOTE: If there are more than two (2) destruction devices, either expand this section to report information for those destruction devices or submit the required reporting information for those devices on separate, attached paper.

**MINE METHANE CAPTURE OFFSET PROJECT DATA REPORT FOR ABANDONED

PART VII: ATTESTATIONS AND OPO SIGNATURE

Initial:	I certify under penalty of perjury under the laws of the State of California the GHG reductions and/or GHG removal enhancements for		
CK	Project Name: Bluesource GCS Bear Canyon	from Reporting Period State Date: 12/01/2020	to Reporting Period End Date: 11/30/2021
	are measured in accordance with the Compliance Offset Protocol Methane Capture Projects, April 25, 2014, and all information required to be submitted to ARB in the Offset Project Data Report is true, accurate, and complete.		
In signing this form, I certify under penalty of perjury of the laws of California that the information contained in this form is true, accurate, and complete. I further certify that I am an Account Representative of the Offset Project Operator (OPO).			
Printed Name: Collon Kennedy		Title: Vice President	
Signature: 		Date: 1/18/2022	

MINE METHANE CAPTURE OFFSET PROJECT DATA REPORT FOR ABANDONED UNDERGROUND MINES FORM

ISD/CCPEB-013 (REV. 10/2020) PAGE 8 OF 10

BACKGROUND

Section 95976(d) of the Cap-and-Trade Regulation specifies reporting requirements for offset projects participating in the Compliance Offset Program. Offset Project Operators (OPO) or Authorized Project Designees (APD) are required to submit an Offset Project Data Report (OPDR) within four months of the end of each (annual) Reporting Period. This form is designed to help OPOs and APDs provide the information required for offset projects using Compliance Offset Protocol Mine Methane Capture Projects, April 25, 2014. This form is submitted to the approved Offset Project Registry that is listing the offset project and should also be provided to the CARB-accredited verification body that will be verifying the Offset Project Data Report.

WHERE TO SUBMIT INFORMATION CONTAINED IN THIS FORM:

Complete the information on the form using your computer. Then either add an electronic signature to the form or print, sign, and scan the form. The completed and signed information and all supporting documentation should be submitted to the appropriate Offset Project Registry.

This form is also available from the CARB website at:

<http://www.arb.ca.gov/cc/capandtrade/offsets/forms/forms.htm>

INSTRUCTIONS

PART I: ENTITY SUBMITTING REPORT

- Indicate whether the Offset Project Operator (OPO) or Authorized Project Designee (APD) is submitting the Offset Project Data Report (OPDR).
- Regulatory amendment in section 95976(d)(10) requires that each version of the OPDR specifies the version number and the date submitted. Moreover, the protocol requires that each OPDR include the date of completion. Include the OPDR version number, the date of OPDR completion, and the date of OPDR submission to the Offset Project Registry.
- The person submitting the information should indicate the date the form is completed.
- List the name, phone, and email address of the person submitting the information. This person should be an employee of the OPO or APD. The person submitting the information need not be the contact person listed for the OPO or APD in Part III and also need not be the OPO's CITSS account representative signing the OPDR in Part VII.

PART II: OFFSET PROJECT INFORMATION

- Provide the name for the offset project and its Offset Project Registry ID number, as provided by the Offset Project Registry listing the project. Also include the CARB project ID number, if known.
- (For active underground mines, specify whether the project type includes either or both of the ventilation air methane and mine methane drainage types. Check the appropriate box (es).)
- Indicate the Offset Project Commencement Date and the start and end date of the Reporting Period covered in this Offset Project Data Report.

PART III: OPO/APD/TC INFORMATION

- Enter contact information for the Offset Project Operator (OPO) and Authorized Project Designee (APD) for the offset project. Every project will have an OPO. If a project does not have an APD, mark the box indicating the project does not have an APD and leave the remaining fields blank.
- For both the OPO and, if applicable, the APD, enter the entity's name, its CITSS ID number, its mailing address, its physical address (if different than mailing address), and the name, phone number, and e-mail address of a contact person for the entity. The CITSS ID is six characters in length, with two letters followed by four numbers (e.g., "CA1234"). **DO NOT PROVIDE THE**

MINE METHANE CAPTURE OFFSET PROJECT DATA REPORT FOR ABANDONED UNDERGROUND MINES FORM

ISD/CCPEB-013 (REV. 10/2020) PAGE 9 OF 10

OPO's or APD's CONFIDENTIAL CITSS ACCOUNT NUMBER, which begins with the CITSS ID number followed by a hyphen and more numbers.

- Provide the same information for any technical consultants to the OPO or APD for this project. Provide the entity's name, its mailing address, its physical address (if different than mailing address), and the name, phone number, and e-mail address of a contact person for the entity.
- If there are no technical consultants or just one technical consultant, the appropriate check boxes may be marked to indicate that required information is not being omitted. If there are more than two technical consultants, either expand this section of the OPDR or provide the required information on separate, attached paper.

PART IV: QUESTIONS

- Indicate the number of abandoned mines included in this project. This question is because the protocol requires for abandoned underground mine methane recovery activities that some reporting information be provided separately for each mine.
- Identify each of the mines included in the project by their Mine Safety and Health Administration (MSHA) identification number. If there are more than four mines, this section should be expanded, or the identification of the mines should be provided on separate, attached paper.
- This part also includes two questions required in Compliance Offset Protocol Mine Methane Projects, April 25, 2014.
- First, the OPO or APD must respond whether the offset project has met all local, state, and federal regulatory requirements during the Reporting Period. Local regulatory requirements include those by any air quality, water quality, zoning, or other agency with jurisdiction over any aspect of the offset project. (For abandoned underground mine methane recovery activities, the OPO or APD must respond about regulatory requirements separately for each mine involved in the project. If there are more than four mines, this section should be expanded, or the response about meeting regulatory requirements for the additional mines should be provided on separate, attached paper.)
- Regulatory amendments in section 95973(b)(1), effective October 1, 2017, allow an OPO or APD to effectively exclude a time period during which a project is out of regulatory compliance and receive CARB or registry offset credits for the remainder of the reporting period. If an OPO or APD is excluding some dates, the OPO or APD should provide the excluded dates.
- Second, the OPO or APD must answer whether information submitted in the offset project listing remains accurate. If the listing information remains accurate, skip to Part V. For information which is no longer accurate, answer questions 3a through 3h to indicate which portions of the listing information is being updated in this report.

PART V: MINE INFORMATION

- Specify the mining method(s) (e.g., longwall, room and pillar, or open-pit) employed during reporting period. (For abandoned underground mine methane recovery activities, specify the mining method(s) employed for each mine while it was active. If there are more than four mines, this section should be expanded, or the information about mining methods for the additional mines should be provided on separate, attached paper.)
- Report the Mineral Production during the Reporting Period. Include both the mineral(s) produced and the amount produced of each mineral (specifying the units).

PART VI: REPORTED GHG EMISSION REDUCTION CALCULATIONS

- For the Reporting Period covered in this Offset Project Data Report, enter the offset project's baseline emissions, its project emissions, and its total GHG reductions. Emissions should be reported in metric tons of CO_2e .

MINE METHANE CAPTURE OFFSET PROJECT DATA REPORT FOR ABANDONED UNDERGROUND MINES FORM

ISD/CCPEB-013 (REV. 10/2020) PAGE 10 OF 10

- Similarly, specify the number of methane sources used in this reporting period. If there are more than three sources, required reporting information for the additional sources should be provided by either expanding the section or by providing the information on separate, attached paper.
- Provide the total emission reductions in metric tons CO_2e .
- Optional: Provide the methane emissions derived from the hyperbolic emission rate decline curve (i.e., AMMDC).
- Within the first two subsections of this part, provide the required baseline parameters. Within the next two subsections, provide the required project parameters. For descriptions of each variable, see the Compliance Offset Protocol Mine Methane Capture Projects, April 25, 2014, including subchapter 7.2 (beginning on page 129) for reporting requirements. Report the volume of mine gas in standard cubic feet (scf).
- For the volume of mine gas calculations (including PSW, PIB, PGW, and NSW), it may be appropriate to report values for only some calculations. As appropriate, fields for the other terms may be left blank.
- If there is only one destruction device, you may check the “not applicable” boxes for the second destruction device indicating these subparts of the MMC OPDR form are being purposely left blank.
- Within the fifth and final subsection of this part, provide the other required reporting information.
- If site-specific methane destruction deficiency is used for any destruction device, provide the destruction efficiency, a description of the process of establishing the methane destruction efficiency, and the identity of any third parties involved. If a site-specific methane destruction deficiency is not used, the “N/A” box may be checked to indicate are being purposely left blank.

PART VII: ATTESTATION AND OPO SIGNATURE

- Section 95975(d)(5) of the Cap-and-Trade Regulation requires an attestation for Offset Project Data Reports. The person signing the form should initial each attestation (no typed or printed initials).
- The attestation requires the applicant to provide some information to complete the statement. The project name should match the name entered in Part II. The dates covering the project Reporting Period must also be provided. Note that the dates provided in the attestation should be the same dates provided in Part II.
- Amendments adopted in April 2014 to section 95976(d)(6) require the attestation “be provided to an Offset Project Registry with the Offset Project Data Report if the offset project is listed with an Offset Project Registry.”
- The individual signing the document must be registered in CITSS as the OPO’s Primary Account Representative or Alternate Account Representative. The individual signing the document may be an APD employee and/or representative; but to sign the document, the individual must be an Account Representative on the OPO’s CITSS account.
- Provide the individual’s signature, printed name, corporate title, and date signed.

BLUESOURCE GCS BEAR CANYON

UPDATE TO LISTING DOCUMENTS

On September 17, 2020, the mine operator listed on the MSHA Mine Data retrieval System was changed from West Ridge Resources Inc (as reported in the listing documents) to Utah Land Resources, Inc. This was a result of a merger between West Ridge Resources Inc and Genwal Resources Inc to form Utah Land Resources, Inc. Operationally, no changes are expected due to this change in name.

Updated Mine Operator Information
