

Verification Statement Addendum

First Environment, Inc. (First Environment), a New Jersey Corporation headquartered at 10 Park Place, Building 1A, Suite 504 Butler, NJ 07405 USA provides this addendum to the verification statement previously issued January 21, 2022 to A-Gas US Inc. and the American Carbon Registry (ACR) as a deliverable of the verification process for the following Project: ("the Project")

Project Name	ACR Project ID	Reporting Period
A-Gas V6	ACR676	1/10/2020 – 12/31/2020

This addendum covers the assessment of the quantification of first-fill and disposal at end-of-life (EOL) emissions under the 'Methodology for the Quantification, Monitoring, Reporting and Verification of the Greenhouse Gas Emissions Reductions and Removals from Certified Reclaimed HFC Refrigerants, Propellants, and Fire Suppressants, Version 2.0' (the Methodology v2.0). The objective of the assessment is to assure the Project's conformance with the emission reduction quantification requirements of the Methodology v2.0. First Environment's role is to provide an independent, third-party assessment of the Project's conformance with the quantification criteria for first-fill and disposal at EOL emission reductions.

The assessment of the Project's GHG emission reductions assertion was based on the following scope:

- *Boundaries of the assertion:* A-Gas reclamation facility;
- *The physical infrastructure, facilities, and activities within the assertion:* Refrigerant reclamation equipment; and
- *GHG sources, sinks, and reservoirs included within the assertion:* Baseline emissions from the first-fill, use, and disposal at EOL of virgin HFCs in refrigeration or air conditioning equipment.

Based on the assessments performed and the historical evidence collected, First Environment concludes that the Project's GHG emission reductions due to the reclamation and resale of HFCs for the period from January 10, 2020 to December 31, 2020 can be considered with a reasonable level of assurance:

- consistent with the updated GHG Project Plan,
- in conformance with the Methodology v2.0, and
- without material discrepancy.

Verified results using the quantification methodology under v2.0 of the Methodology show:

January 10 to December 31, 2020	Total
Baseline Emissions (tCO ₂ e)	1,908,868
Project Emissions (tCO ₂ e)	N/A
Emissions Reductions (tCO ₂ e)	1,908,868

The verified outstanding Emission Reductions Tonnes (ERTs) to be issued are as follows:

January 10 to December 31, 2020	Total
New ERTs Total	1,908,868
Original ERTs Total	1,236,029
Total Outstanding ERTs	672,839
