

American Carbon Registry Carbon Offset Project Listing Form

Instructions: Please fill out the below questions as completely and accurately as possible based on current project details. We understand some details may be adjusted prior to the validation of the full GHG Project Plan.

This form is required for all new ACR projects submitted for listing review per the Project Development Trajectory requirements presented in the ACR Program Standard, Chapter 6. Project Proponents should review the ACR eligibility criteria in the latest ACR Program Standard, Chapter 3, as well as the requirements of the relevant ACR-approved methodology to assess project eligibility prior to submitting this form.

This form must be completed and executed by a duly authorized representative of the Project Proponent.

General Project Details	
ACR Project ID	ACR819
Project Title	HT HFC Reclamation Project Georgia 2021
Chosen Methodology: Name and Version	Certified Reclaimed HFC Refrigerants, Propellants, and Fire Suppressants, Version 2.0.
Applicable version of ACR Standard	7.0
Project Location(s)	Atlanta, GA
Project Start Date	02/01/2021
Crediting Period	15 Years
Expected first Reporting Period	02/01/2021 - 12/31/2021
Summary Description of Project	HT HFC Reclamation Project Georgia 2021 is a voluntary carbon offset project undertaken by Hudson Technologies that comprises of HFC reclamation processes and resale of the reclaimed gas to the US refrigerant market. The project covers the timeframe of February 1, 2021 to December 31, 2021. The project intends to reduce approximately 400,000 metric tonnes of CO2 eq from being emitted into the atmosphere. Hudson has purchased recovered refrigerant from contractors and wholesale companies around the

	US, processed it through reclaim equipment at our Atlanta, GA facility, and sold it for use in hvac equipment around the US
Process Questions	
Was/Is this Project Listed on Another Registry?	No
Will all relevant monitoring, metering and quantification requirements be followed as written in methodology?	Yes
Does the Project Proponent maintain undisputed title to all potential offsets that is clear, unique and uncontested?	Yes
Will the GHG Project Plan be validated within the timeframe required by the ACR Standard, Chapter 3, Table 2?	Yes
Is there an existing law, regulation, statute, legal ruling, or other regulatory framework in effect as of the project Start Date that mandates the Project Activity or effectively requires the GHG emissions reductions?	No
Project Management	
Project Proponent	Hudson Technologies Company
Technical Consultants, if any	N/A
Additional Affiliated Parties, if any	N/A
Signature	
Project Proponent Representative Submitting Form: Name and Title	Jonathan Stack, Director of Sustainability
Signature	X
