1	Inventory Methodology	Outlines procedures necessary for collecting data for the carbon project.	Detail and clarification was added to the stratification section. Clarifications and details added include how stratification was completed, inventory stratification rules that were followed, assessment area stratification, and plans for future restratification. Clarification and details were also added to the walkthrough procedure section of the inventory methodology. Standing Dead measurements were also clarified that dead trees leaning greater than 45 degrees from vertical shall be disregarded and not measured. Additionally, 2 live tree defect examples were included in the live defect section of the methodology.	Completed By: Megan Finlay Mailing Address: 12825 E. Cottonwood Parkway Suite 400 Cottonwood Heights, UT 84121 Phone Number: 705 626 3328 Email: mfinlay@anewclimate.com	2022-09-28
