# F. ENVIRONMENTAL AND COMMUNITY IMPACTS

## F1. NET POSITIVE IMPACTS

The below identify Sustainable Development Goals to which the project aligns and positively contributes:

Sustainable Development Goal	Target	Project Action
<b>6. Clean Water and Sanitation</b>	6.6 By 2020, protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers, and lakes.	The watershed protection goals of the project proponent can be found detailed in the “Aquatic Resources” sections of the Shafer-Tuuk Working Woodlands Forest Management Plan.
<b>13. Climate Action</b>	<p>13.1 Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries.</p> <p>13.2 Integrate climate change measures into national policies, strategies, and planning.</p>	<p>The goal of the project proponent in committing to sustainable forest management practices will be to continually sequester and prevent intensive forest management as described in both Section B6 and in Section E of this GHG Plan, respectively.</p> <p>The climate-related goals of the project proponent can also be found detailed in the “Non-native/Invasives”, “Disturbance Regimes”, “Desired Future Conditions and Long-term Vision”, and “Forest Carbon Sequestration and Management” sections of the Shafer-Tuuk Working Woodlands Forest Management Plan.</p>
<b>15. Life on Land</b>	15.1 By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains, and drylands, in line with obligations under international agreements.	The conservation goals of the project proponent can be found detailed in the “Connectivity & Proximity to Protected Lands”, “Wildlife Resources”, “Threatened, Endangered, Species of Concern, and Rare Species Resources”, “Special Sites and Features”, “High Conservation Value Forests (HCVFs)”, and “Landscape Level Considerations”

	<p>15.2. By 2020, promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally.</p> <p>15.a. Mobilize and significantly increase financial resources from all sources to conserve and sustainably use biodiversity and ecosystems.</p>	<p>sections of the Shafer-Tuuk Working Woodlands Forest Management Plan.</p>
