F. ENVIRONMENTAL AND COMMUNITY IMPACTS

F1. NET POSITIVE IMPACTS

The below identify Sustainable Development Goals to which the project aligns and positively contributes:

Sustainable Development Goal	Target	Project Action
6. Clean Water and Sanitation	6.6 By 2020, protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers, and lakes.	The watershed protection goals of the project proponent can be found detailed in the “Anadromous Fish Habitat”, “Landowner Objectives”, “Klawock Watershed Council Management Plan”, “Forest Management Goals and Objectives”, and “Riparian Forest Buffer” sections of the Shaan Seet Forest Stewardship Plan.
13. Climate Action	13.1 Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries. 13.2 Integrate climate change measures into national policies, strategies, and planning.	The goal of the project proponent in committing to sustainable forest management practices will be to continually sequester and prevent intensive forest management as described in both Section B6 and in Section E of this GHG Plan, respectively.
15. Life on Land	15.1 By 2020, ensure the conservation, restoration and sustainable use of terrestrial and inland freshwater ecosystems and their services, in particular forests, wetlands, mountains, and drylands, in line with obligations under international agreements. 15.2. By 2020, promote the implementation of sustainable management of all types of forests, halt deforestation, restore degraded forests and substantially increase afforestation and reforestation globally.	The conservation goals of the project proponent can be found detailed in the “Anadromous Fish Habitat”, “Landowner Objectives”, and “Silvicultural Examination, Prescription, and Treatment” sections of the Shaan Seet Forest Stewardship Plan.
