

American Carbon Registry Carbon Offset Project Listing Form

Instructions: Please fill out the below questions as completely and accurately as possible based on current project details. We understand some details may be adjusted prior to the validation of the full GHG Project Plan.

This form is required for all new ACR projects submitted for listing review per the Project Development Trajectory requirements presented in the ACR Program Standard, Chapter 6. Project Proponents should review the ACR eligibility criteria in the latest ACR Program Standard, Chapter 3, as well as the requirements of the relevant ACR-approved methodology to assess project eligibility prior to submitting this form.

This form must be completed and executed by a duly authorized representative of the Project Proponent.

General Project Details	
ACR Project ID	632
Project Title	Anew - Eagle Mountain Forestry Project
Chosen Methodology: Name and Version	Improved Forest Management for Non-Federal U.S. Forestlands Version 1.3
Applicable version of ACR Standard	ACR Standard Version 7.0
Project Location(s)	New York, New Hampshire, Vermont, and Maine
Project Start Date	March 26, 2021
Crediting Period	March 26, 2021 - March 25, 2041
Expected first Reporting Period	March 26, 2021 - March 25, 2022
Summary Description of Project	The Anew - Eagle Mountain Forestry Project is located on approximately 6,142 acres in Essex County, New York; Hillsborough County, New Hampshire; Windsor County, Vermont; and Franklin County, Maine. By committing to maintain forest CO ₂ stocks through no-harvest/wilderness management, the project will provide significant climate benefits through carbon sequestration.

Process Questions	
Was/Is this Project Listed on Another Registry?	No
Will all relevant monitoring, metering and quantification requirements be followed as written in methodology?	Yes
Does the Project Proponent maintain undisputed title to all potential offsets that is clear, unique and uncontested?	Yes
Will the GHG Project Plan be validated within the timeframe required by the ACR Standard, Chapter 3, Table 2?	Yes
Is there an existing law, regulation, statute, legal ruling, or other regulatory framework in effect as of the project Start Date that mandates the Project Activity or effectively requires the GHG emissions reductions?	No
