AMERICAN CARBON REGISTRY

Dear American Carbon Registry (ACR),

We provide here a brief statement on the conclusion SCS Global Services (SCS) has reached regarding the GHG assertion documented in the monitoring report describing the GHG emission reductions or removal enhancements attributed to the **Fielding Environmental HFC Reclamation Offset Project-2020** (ACR#760) for the **13 January 2020 to 31 December 2020 reporting period**. The overall goal of the third-party validation/verification was to review impartially and objectively the claimed GHG emission reductions/removal enhancements claimed by Fielding Chemical Technologies, Inc. against relevant ACR standards and the approved methodology. The verification was carried out against Version 7.0 of the ACR Standard and the Methodology for the Quantification, Monitoring, Reporting and Verification of Greenhouse Gas Emissions Reductions and Removals from Certified Reclaimed HFC Refrigerants, Propellants, and Fire Suppressants Version 2.0 (April 2022).

SCS concludes, with no qualifications or limitations and with a reasonable level of assurance, that the GHG assertion and reported GHG emission reductions or removal enhancements as set out below conform to the verification criteria and are without material discrepancy, as defined by the ACR.

Reported Greenhouse Gas Emission Reductions or Removal Enhancements	
Period	Emission Reductions/Removal Enhancements (tCO ₂ e)
13 January 2020 to 31 December 2020	80,697

Lead Auditor Approval	 Tina Sentner, 17 April 2023
Internal Reviewer Approval	 Carolin Judd, 17 April 2023
