GHG Project Plan: Wolf Lands Forest Carbon Project - prepared by Wolf Lands, Inc. and Spatial Informatics Group (SIG). The project's verification was conducted as part of ACR's program requirements for GHG offset projects.

The verification included the initial validation and verification of carbon sequestered through the end of the reporting period (19 May 2021). The project utilized the Improved Forest Management Methodology for Quantifying GHG Removals and Emission Reductions through Increased Forest Carbon Sequestration on Non-Federal U.S. Forestlands, version 1.3, and the ACR Tool for Risk Analysis and Buffer Determination, version 1.0, and ACR's guidance document Aggregation and Programmatic Development Approach Guidance for Improved Forest Management v1.0. The GHG Project Plan verification included carbon sequestered through Improved Forest Management (IFM) on approximately 11,275 acres. The project asserts net emissions reductions/removals of 56,774 tCO₂e for the reporting period 20 May 2020 – 19 May 2021.

This verification statement confirms that Aster Global Environmental Solutions, Inc., (ACR-Approved Verifier) has evaluated the GHG assertion by Wolf Lands, Inc. (Project Proponent) covering the period from 20 May 2020 – 19 May 2021 according to the protocols outlined by the American Carbon Registry and ISO, specifically: the ACR Standard and ISO 14064-3:2006, and ISO 14065:2013.

Aster Global Environmental Solutions, Inc., (ACR-Approved Verifier) confirms all verification activities including objectives, scope and criteria, level of assurance and the project's adherence to the ACR Standard and the validated GHG Project Plan (dated December 2022), as documented in the validation/verification report entitled 21080.00_SIG WolfLands_ACR ValVer_Report are complete. Aster Global concludes without any qualifications or limiting conditions that the GHG assertions made by project for the 2020 and 2021 reporting period are without material discrepancy and that the verification activities provide a reasonable level of assurance as defined by ACR Standard v7.0.

The GHG assertion provided by Wolf Lands, Inc. and verified by Aster Global has resulted in the GHG emission reductions of 56,774 tCO₂e equivalents by the project during the verification period/reporting period (20 May 2020 – 19 May 2021).
