

Verification Statement

First Environment, Inc. (First Environment), a New Jersey Corporation headquartered at 91 Fulton Street, Boonton, NJ 07005 USA provides this verification statement to CommonWealth Bethlehem Energy, LLC and the American Carbon Registry (ACR) Chief Technical Officer as a deliverable of the verification process for the North Country LFG Utilization Project ("the Project"). This verification covers the reporting period for the Project from January 1, 2011 through April 11, 2011 and was conducted against the American Carbon Registry Standard, Version 2.1, October 2010 (ACR Standard) and the project-specific Monitoring, Reporting and Verification Protocol for the North County Landfill Gas Utilization Project (MRV CBE 2005 15), May 2009.

The objective of verification activities is to assure the Project's conformance with the verification criteria and ACR requirements. First Environment's role as the verifier is to provide an independent, third-party assessment of the Project's conformance with the verification criteria.

First Environment was retained to provide verification services for the Project's greenhouse gas (GHG) emission reductions assertion based on the following scope:

- *Boundaries of the assertion:* North Country Environmental Systems Landfill operations;
- *The physical infrastructure, facilities, and activities within the assertion:* Landfill gas collection and destruction operations;
- *GHG sources, sinks, and reservoirs included within the assertion:* CH₄ emissions from anaerobic decomposition of waste

Based on the assessments performed and the historical evidence collected, First Environment concludes that the Project GHG emissions reductions, due to the capture and combustion of methane gas for the period January 1, 2011 through April 11, 2011, can be considered with a reasonable level of assurance:

- consistent with the GHG Project Plan,
- in conformance with the ACR Standard and the MRV CBE 2005 15,
- without material discrepancy, and
- meeting the minimum level of accuracy of at least 95 percent.

Verified results show:

Reporting Period: January 1, 2011 through April 11, 2011	Total
Baseline Emissions (tCO ₂ e)	40,121
Project Emissions (tCO ₂ e)	N/A
Emissions Reductions (tCO ₂ e)*	40,121
